Profile

I am a creative stylist and costume designer who has worked extensively across film projects including TVC, feature, shorts and advertising/commercial.

Having run and been a part of teams on long and short term productions a key characteristic is for the success is openness and willing to learn as well as imparting knowledge and confidence to encourage teams to grow whilst all the time providing a professional and unflappable crew!

I have great experience in presenting concepts to Clients for advertising campaigns and editorial shoots. Each production house giving budget, deadlines and targets to fulfil for my department and so using the funds carefully and to the maximum to output a rewarding result for all who took part. I believe that clear and regular communication is key within a team. Encouragement and motivation to keep a team at speed with trends in design, fashion and interiors, which all can lead to a capable and pro active environment.

To work with teams and collaborators to produce the most stimulating and original works possible to fit the brief given is a passion as each talented individual has their part to play in the final result.
