ABOUT ME

I have worked as a runner on a number of commercials and music promos and have since been doing whatever I can in order to get more work and experience. I've spent time working at a set design rental house in order to get experience in as many different departments as I could. I drive and have business insurance and am very keen to run and learn more about the industry any way I can. I also do gardening on the side, so I am used to manual labour and lifting heavy things.
